

Portrait of our directors

EXPRESS INTERVIEW

With ...

Mr. Luc Jalbert, Eng.

Entrepreneur

Impression 3D industrielle ALVA

Board of Directors of
CAE Rive-Nord since:

2017

Current term:

Administrator

Distinctive qualities:

Passionate

Perseverance

Why did you agree to sit on the CAE Board of Directors?

In the past, I have had the occasion to work with CAE, and I really liked the team dynamics. We know that the financial world can be *drab* sometimes, but not at CAE. The team is very proactive, contrary to other environments. I have always been impressed by the speed with which financing requests are processed. As an entrepreneur, I need answers quickly to be able to take the right decisions for my business.

Where do you see CAE in 5 years?

Currently, I believe that there is a good complementarity of services between CAE and other financial institutions. In 5 years, the needs of entrepreneurs will be more present. Since the conventional financing is less open to taking risks, CAE will break through by adapting to the needs of entrepreneurs, and this is where they will stand out. The services will evolve, and the CAE team will remain attentive to companies in order to find alternative solutions for financing.

“Being passionate about your field is why we go through hardships. Perseverance, can master many things”.

- Luc Jalbert

ABOUT....

ALVA is an industrial 3D printing company with more than 25 years in industrial design. The products made by the company stand out by their printing quality and their mechanical properties. Alva uses a unique technology, which is to print nylon by inserting continuous fiber of another material, such as carbon fiber.

The result is a lightweight product with mechanical properties comparable to those of aluminum. Alva allows you to bring your designs to product quickly with a minimum of investment and helps you advance your ideas.
